Full Range White Spirit Solvent

DEAROMATIZED ALIPHATIC HYDROCARBON FLUIDS

Specialty Distilled and Dearomatized White Spirit Solvent. White Spirits are characterized by mild odors, clean evaporation and solvency power to meet the requirements of a broad range of applications. White spirits are the products of a petrochemical refinery characterized by:

- A hydrocarbon with the number of carbons mainly in the C5-C15 range
- A typical boiling point range between 130 and 240°C
- Clear color-less solvent with very low water solubility

GULFCHEMY Full Range White Spirit Solvent has very good solvent power and is therefore often used in applications such as: resins, paints, cleaning products, degreasers in dispensers or tubs, metal-working formulations and similar end users.

Typical Sales Specifications

Properties	Minimum	Maximum	Test Method
Appearance	Bright and Clear	Bright and Clear	ASTM D4176 Modified
Aromatic Content, vol.%	12	22	Liquid Chromatography
Color, (Saybolt)	27		ASTM D156 Modified
Distillation (°C) IBP Dry Point	150	237	ASTM D86 Modified
Flash Point, (°C) (Tag Closed Cup)	42		ASTM D56 Modified
Specific Gravity, 20 °C	0.76	0.82	ASTM D1250 Modified
