**Dear Friends**

**I hope you are doing great. As we speak to the students at our partner Universities, we are often asked, “Do you have a certification program for business professionals”? IACPE was originally founded to train and certify engineers, but we have expanded into other areas where there is an expressed interest.**

**We are pleased to announce that we have developed a program for Business Professionals that work in and around those zany engineers.**

**Certified Practicing Management Specialist Program (CPMS)**

[\*\*http://www.iacpe.com/cpms-program.html\*\*](http://www.iacpe.com/cpms-program.html)

**This program is for Business Professionals working in Refining, Petrochemicals, and Specialty Chemical or would hope to work in these industries in the future. The modules were built to guide Business Professionals in understand basic flows of process plants, introduction to production economics, and an introduction to project management.**

**The CPMS Modules Include**

- 1. Introduction to Business Management**
- 2. Introduction to Project Management**
- 3. Engineering Ethics**
- 4. Introduction to Refining**
- 5. Introduction to Ethylene**
- 6. Introduction to Petrochemicals**
- 7. Introduction to Chemical Production Economics**
- 8. Inherently Safer Design**

## **Cost**

**IACPE provides competitive in-country pricing for the students, industries, and companies. To contact IACPE about pricing please fill out the Contact IACPE Form.**

**The CPMS Program pricing includes:**

**Eight (8) Engineering Curriculum Module Documents**

**Eight (8) Engineering Curriculum Module Study Questions**

**Eight (8) Engineering Curriculum Module Tests**

**A one-hour oral exam**

**All the Best**
