This workshop is designed for operations, technical, maintenance personnel and managers to share experiences that allows continuous improvement which is vital to ensure reliable and optimized operations. The material may also be a good introduction for procurement related personnel who may develop an understanding of overall systems and how they can balance performance and commercial interest

KLM has been supporting the refining industry companies for the past 27 years via its consulting and training. KLM has worked with licensors and EPCs for major revamps, debottlenecking and greenfield projects. The workshop facilitators each have more than 20 years' worth of experience which will make the sessions invaluable.
